

# NYC Dynamics Seminar at Yeshiva University

---

## Meeting irregularly on Wednesdays at 5pm

Lectures will last 1 hour and be followed by 30 minutes for further lecture and/or discussion.

## Yeshiva University, 215 Lexington Ave, Room 506

On the SW corner of Lexington Ave and 33rd Street. You will need to sign in.

---

NYC Dynamics Seminar at Yeshiva University is a research level seminar with a broad agenda aimed at research mathematicians and graduate students whose interests include various aspects of the modern theory of dynamical systems and related topics in analysis, geometry, number theory and possibly other subjects. Its aim is to supplement more specialized seminars in the NYC area and provide a meeting place and a venue for discussions for mathematicians associated with various universities and colleges in the NYC metropolitan area working or interested in dynamical systems. The seminar will primarily feature speakers from outside the area specially invited for this purpose as well as mathematicians visiting various NYC universities. Core financial support for the seminar is provided by the Center for Mathematical Sciences at Yeshiva University.

**Organized by:** Marian Gidea (Yeshiva University)  
Pat Hooper (City College and CUNY Graduate Center)  
Anatole Katok (Penn State and Yeshiva University)

---

## Speakers for the spring semester will include:

February 24: **Barak Weiss** (Tel Aviv University)

March 2: **Boris Hasselblatt** (Tufts University)

March 9: **Rafael de la Llave** (Georgia Tech)

April 6: **Federico Rodriguez Hertz** (Penn State)

May 4: **Omri Sarig** (Weizmann Institute of Science)
